RESEARCH ARTICLES

Best, P. B., Sekiguchi, K., Findlay, K. P.

A suspended migration of humpback whales *Megaptera novaeangliae* on the west coast of South Africa

1-12

Fujita, T., Inada, T., Ishito, Y.

Depth-gradient structure of the demersal fish community on the continental shelf and upper slope off Sendai Bay, Japan

13-23

Krom, M. D., Ellner, S., van Rijn, J., Neori, A.

Nitrogen and phosphorus cycling and transformations in a prototype 'non-polluting' integrated mariculture system, Eilat, Israel

25-36

Ojeda, F. P., Cáceres, C. W.

Digestive mechanisms in *Aplodactylus punctatus* (Valenciennes): a temperate marine herbivorous fish

37-42

Speare, P.

Parasites as biological tags for sailfish *Istiophorus platypterus* from east coast Australian waters

43-50

Grutter, A. S.

Relationship between cleaning rates and ectoparasite loads in coral reef fishes

51-58

McCormick, M. I., Molony, B. W.

Influence of water temperature during the larval stage on size, age and body condition of a tropical reef fish at settlement

59-68

Ainley, D. G., Sydeman, W. J., Norton, J.

Upper trophic level predators indicate interannual negative and positive anomalies in the California Current food web

69-79

Böttger-Schnack, R.

Summer distribution of micro- and small mesozooplankton in the Red Sea and Gulf of Aden, with special reference to non-calanoid copepods

81-102

Broekhuizen, N., McKenzie, E.

Patterns of abundance for *Calanus* and smaller copepods in the North Sea: time series decomposition of two CPR data sets

103-120

Uye, S., Sano, K.

Seasonal reproductive biology of the small cyclopoid copepod *Oithona davisae* in a temperate eutrophic inlet

121-128

Connolly, R. M.

Effects of removal of seagrass canopy on assemblages of small, motile invertebrates

129-137

Loneragan, N. R., Wang, Y.-G., Kenyon, R. A., Staples, D. J., Vance, D. J., Heales, D. S.

Estimating the efficiency of a small beam trawl for sampling tiger prawns *Penaeus esculentus* and *P. semisulcatus* in seagrass by removal experiments

139-148

Rasmussen, T., Tande, K.

Temperature-dependent development, growth and mortality in larvae of the deep-water prawn *Pandalus borealis* reared in the laboratory

149-157

Anil, A. C., Chiba, K., Okamoto, K., Kurokura, H.

Influence of temperature and salinity on larval development of *Balanus amphitrite*: implications in fouling ecology

159-166

Ebersole, E. L., Kennedy, V. S.

Prey preferences of blue crabs *Callinectes sapidus* feeding on three bivalve species

167-177

Poulin, É., Féral, J.-P.

Pattern of spatial distribution of a brood-protecting schizasterid echinoid, *Abatus cordatus*, endemic to the Kerguelen Islands

179-186

James, R. J., Lincoln Smith, M. P., Fairweather, P. G.

Sieve mesh-size and taxonomic resolution needed to describe natural spatial variation of marine macrofauna

187-198

Piepenburg, D., Blackburn, T. H., von Dorrien, C. F., Gutt, J., Hall, P. O. J., Hulth, S., Kendall, M. A., Opalinski, K. W., Rachor, E., Schmid, M. K.

Partitioning of benthic community respiration in the Arctic (northwestern Barents Sea)

199-213

Reay, W. G., Gallagher, D. L., Simmons, G. M. Jr

Sediment-water column oxygen and nutrient fluxes in nearshore environments of the lower Delmarva Peninsula, USA

215-227

Vidal, M., Morguí, J.-A.

Short-term pore water ammonium variability coupled to benthic boundary layer dynamics in Alfacs Bay, Spain (Ebro Delta, NW Mediterranean)

229-236

Poremba, K., Hoppe, H.-G.

Spatial variation of benthic microbial production and hydrolytic enzymatic activity down the continental slope of the Celtic Sea

237-245

Hein, M., Pedersen, M. F., Sand-Jensen, K.

Size-dependent nitrogen uptake in micro- and macroalgae

247-253

Burford, M. A., Rothlisberg, P. C., Wang, Y.

Spatial and temporal distribution of tropical phytoplankton species and biomass in the Gulf of Carpentaria, Australia

255-266

Carpenter, E. J., Roenneberg, T.

The marine planktonic cyanobacteria *Trichodesmium* spp.: photosynthetic rate measurements in the SW Atlantic Ocean

267-273

Suttle, C. A., Chan, A. M.

Viruses infecting the marine Prymnesiophyte *Chrysochromulina* spp.: isolation, preliminary characterization and natural abundance

275-282

REVIEW

Søndergaard, M., Middelboe, M.

A cross-system analysis of labile dissolved organic carbon

283-294

NOTES

Tupper, M., Boutilier, R. G.

Size and priority at settlement determine growth and competitive success of newly settled Atlantic cod

295-300

Uchida, T., Yamaguchi, M., Matsuyama, Y., Honjo, T.

The red-tide dinoflagellate *Heterocapsa* sp. kills *Gyrodinium instriatum* by cell contact

301-303

Andres, N. G., Witman, J. D.

Trends in community structure on a Jamaican reef

305-310

MARINE ECOLOGY PROGRESS SERIES

HISTORY: Marine Ecology Progress Series (MEPS) was established in response to requests from numerous marine ecologists from all over the world. When founded, MEPS was based on 'Marine Ecology' – the first comprehensive, integrated treatise on life in oceans and coastal waters – conceived, organized and edited by Professor Otto Kinne, and published by John Wiley & Sons.

AIM: MEPS serves as a world-wide forum for all aspects of marine ecology, fundamental and applied. The journal covers: microbiology, botany, zoology, ecosystem research, biological oceanography, ecological aspects of fisheries and aquaculture, pollution, environmental protection, conservation, resource management.

Ecological research has become of paramount importance for man's future. The information presented here should, therefore, encourage critical application of ecological knowledge for the benefit of mankind and, in fact, of life on earth. Marine Ecology Progress Series has received recognition as the leader in its field. The journal strives for

- complete coverage of the field of marine ecology
- the highest possible quality of scientific contributions
- quick publication
- a high technical standard of presentation.

SCOPE: MEPS is international and interdisciplinary. It presents rigorously refereed and carefully selected research articles, reviews and notes, as well as comments, concerned with:

Environmental Factors: Tolerances and responses of marine organisms (microorganisms, autotrophic plants, and animals) to variations in abiotic and biotic components of their environment; radioecology.

Physiological Mechanisms: Synthesis and transversion of organic material (mechanisms of auto- and heterotrophy); thermo-, ion-, osmo- and volume-regulation; stress resistance; non-genetic and genetic adaptation; population genetics; orientation in space and time; migrations; behavior; molecular basis of ecological processes.

Cultivation: Maintenance and rearing of, as well as experimentation with, marine organisms under environmental and nutritional conditions which are, to a considerable degree, controlled; analysis of the physiological and ecological potential of individuals, populations and species; determination of nutritional requirements; ecological aspects of aquaculture; water-quality management; culture technology.

Dynamics: Production, transformation, and decomposition of organic matter; flow patterns of energy and matter as these pass through organisms, populations and ecosystems; biodiversity; variability of ecosystem components; trophic interrelations; population dynamics; plankton ecology; benthos ecology; estuarine and coastal ecology; wadden-sea ecology; coral reef ecology; deep-sea ecology; open-ocean ecology; polar ecology; theoretical ecology; ecological methodology; ecological modelling and computer simulation.

Ocean Management: Human-caused impacts: their role as modifiers and deformers of living systems, their biological consequences and their management and control; inventory of living resources in coastal areas, estuaries and open oceans; ecological aspects of fisheries; pollution of marine areas and organisms; protection of life in the seas; management of populations, species and ecosystems; management of coastal zones and sea areas; biotechnology.

Scientific publications appearing in this journal have been rigorously refereed, carefully quality-improved, and professionally selected by our editorial staff. These publications, and all parts thereof, are protected by copyright. This covers the exclusive rights of the publisher to *reproduce* (by any means, including photographic or electronic), to *distribute* (including via photocopies, reprints, or electronic means), and to *store* on microfilm, in electronic data bases, on video disks, etc., this material. The acceptance regulations of a manuscript for publication automatically include the consent of the author(s) to transfer the copyright to the publisher. Permission for exceptions to these rules must be obtained in writing from the publisher at the time of manuscript submission.

In the USA, photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee (US \$3.00 per article) is paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA.

Publisher, editors and authors do not accept legal responsibility for errors, omissions or claims, nor do they provide any warranty, express or implied, with respect to information published in MEPS.

Tables of contents and tables of contents with abstracts for MEPS are available free of charge on the Internet via World Wide Web (<http://www.int-res.com/int-res>).
